TABLET

NoteCart Simple Tablet

Compact version with room for 30 Tablets, incl. NoteSync Lite

NoteCart Simple 30 Tablet stores, synchronises, charges and transports 30 Tablets

This cart is universal and can be used for all types of tablets. Tablets are stored vertically on a protective foam and charged with the charging units accompanying the tablets. The charging plug is passed through the fixed partition, hereby avoiding the usual cable chaos. This version also contains NoteSync Lite, a device that can charge as well as synchronise tablets. NoteSync Lite can be removed from the cart and used independently of NoteCart as a separate charging and synchronisation unit – please see information sheet for "NoteSync Lite".

NoteCart Simple Tablet offers possibilities for purchasing additional functions according to one's needs. Please also see information sheet "Options for NoteCart Simple", e.g. NoteSecure – for theft protection or Timer control of the power panel. See also information sheet for "NoteCharge Lite".
